

QUALITY POLICY

TAT RESILTECH SL is engaged in the business of design, development, manufacture, marketing and and delivery of Coldworking equipment for the aerospace industry. We recognize that quality, health and safety are integral parts of the company's functioning and therefore operate under the control of a Quality Management System according to the EN 9100:2016 aerospace standard. We are fully committed to complying with its applicable requirements.

Our Quality Management System adapts to technological, economical and legal changes in industry and society. Frequent communication with our clients is therefore essential in order for us to be up to date concerning their needs and requirements.

Our employees are trained in the requirements of the Quality Management System in order to ensure future success. Teamwork, open communication and trust is encouraged in order to make our organization successful. Employees should meet the requirements of the Quality Management System and high safety standards are implemented.

Our dedication to continuous improvement of all processes, from purchase of material to final quality control ensures our leading position in the industry and that we exceed the quality standard expected by our customers. Through audits, reviews and quality objectives the Quality Management System is effectively maintained.
